PROFILE

I'm a civil engineering bachelor and data science practitioner focused on developing solutions to business problems including classification, regression, and clustering. In the past year, I've developed solutions for business problems such as identifying customers in churn, prioritizing customers for cross-selling, reducing CAC values by predicting customers behavior and store sales prediction.

EMPLOYMENT HISTORY

METRICA, Natal — Infrastructure Draftsperson

SEPT, 2016 - NOV, 2019

Using AutoCAD Civil3D in the development of infrastructure projects such as wastewater treatment plants, road design, and earthwork.
